

Late Submission of term work:

1% will be deducted for each working day late. **NO WORK WILL BE ACCEPTED after the "marked by" date.**

If you have to miss classes and/or assignments due to ill-health or other reasons, **then contact your registrar and also the Physics Departmental Office during the week of absence.** If you don't do this, then I will not make any allowances for late submission of work.

From time to time, we may have to agree to adjust some of the term work dates. After an agreement is reached in class, **the new agreed date is firm, final, and cannot be individually renegotiated.**

Problem Sets:

A substantial amount of your grade will be assessed on the problem sets. **Because of this, the problem sets you turn in *must* represent your own work.** Clearly you will discuss the solutions to them with your friends. That's fine. However, the submitted solution **must be your own work.** Copies of others' work is **plagiarism, which is not acceptable; you should read the calendar, if you doubt this.** Discuss how to do the problems with anyone you like. But then go off and do it own your own... and then hand it in.

Please write legibly. Try to help me understand what you have done, so that you get full credit. Illegible, illogically arranged work runs the risk of getting zero credit.

FUN:

This course is supposed to be interesting. We should all try to **enjoy** it! If you find it too difficult, or too easy, or if I talk too quickly, or too slowly... **Tell Me!!**

The **best** way of giving me feedback is to **ask questions.** If you have a question, however apparently trivial, chances are that everyone else is puzzling over the same point. **Ask Me...** it'll make me feel good to answer! Smart remarks, jokes, and criticisms are also acceptable.
