
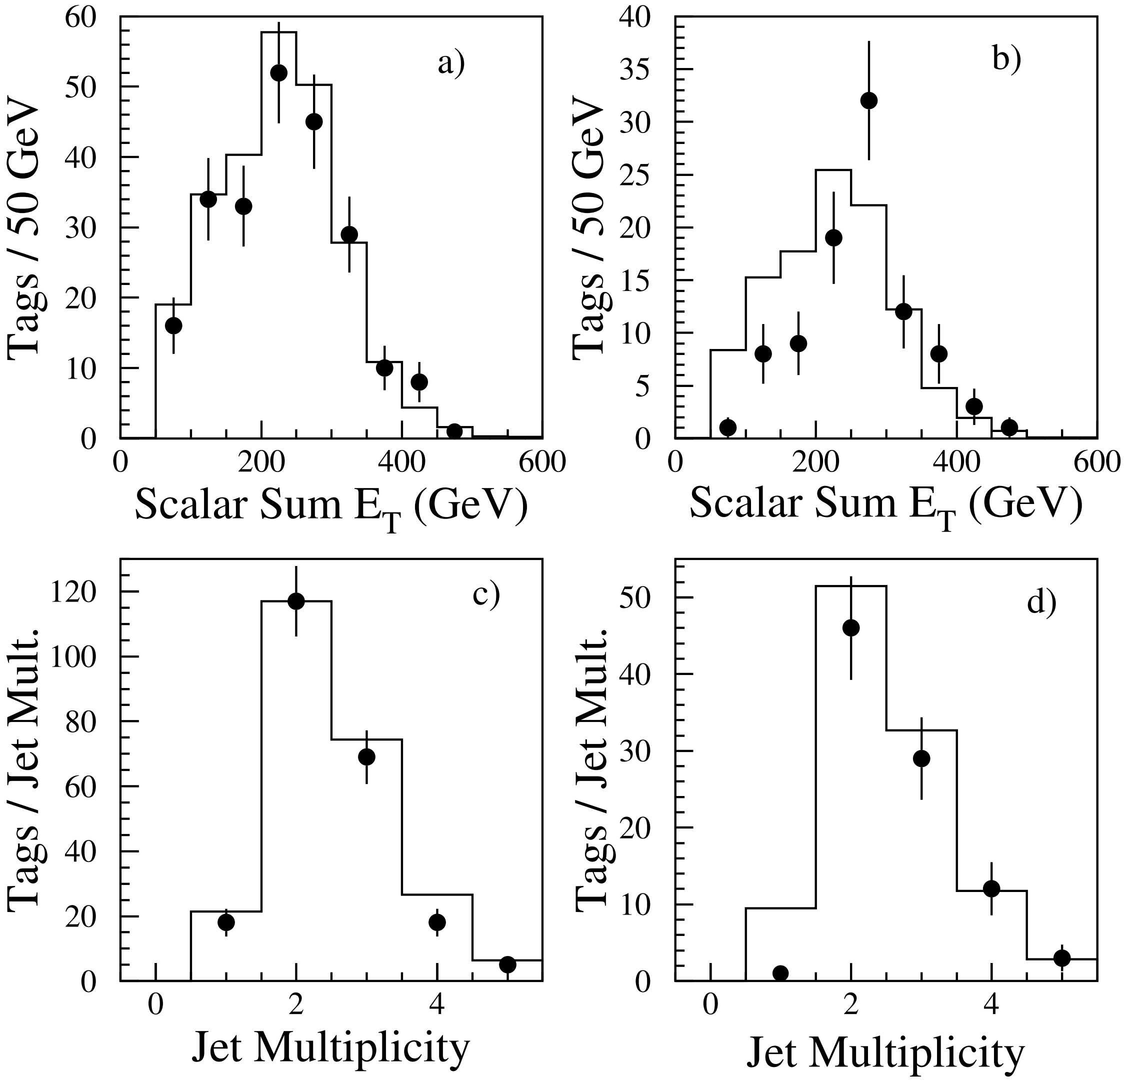

Figure 27: The predicted number of tags (solid histogram) using the 50 GeV jet-trigger sample tag rate and the actual number of tags observed (points) in the 100 GeV jet-trigger sample vs. scalar sum E_T in the event for a) the positive L_{xy} tags and b) negative L_{xy} tags, and vs. event jet multiplicity for c) the positive L_{xy} tags and d) negative L_{xy} tags.
