IPP Offline Activities

Have a long list of offline tasks

1. Management of CDF Offline group (PKS - 0.5 FTE)
2. CDFSIM (Sganos)
3. Geometry (Ragan)
4. Bank dump code - BNK (Sganos)
5. Physics Utilities - PU and UTI (Warburton)
6. DF (Warburton)
7. Generator area (PKS)

Have to reexamine list of responsibilities for Run II

- Can't be stretched too thin
- Can't just drop these either

One Proposed Plan

List of tasks is probably too large at the moment

- Have to prioritise tasks
- identify which ones are already orphans
  - CDFSIM
  - BNK
  - Generator (maybe)
- Which ones are one their way...
  - DF and Utilities?

Address our offline involvement for Run II

- Have to redesign offline system
- No more VMS
- Integrate non-FORTRAN/77 languages
